

Sending and Receiving Studbooks from PopLink 2.1 - 2.4

To backup, zip, and send a studbook from PopLink:

1. Open your studbook in PopLink
2. Click on 'File' at the top left of your screen to get a drop-down menu to appear.
3. In this menu, click on 'Backup Database.'
4. This will create a folder with the same name as your studbook and today's date that should appear on your desktop. This is the backup database.
5. Right-click on this folder and scroll down to 'Send to.'
6. Another menu will appear next to this first menu and select 'Compressed (zipped) Folder.'
7. A new folder will appear on your desktop (or wherever you chose to save it in step 7) with your studbook's name, but ending in .zip.
8. Open the following link in a webpage: <https://lpzoo.sharefile.com/r/r81af4b8021b4589b>
9. Enter your information for tracking purposes.
10. Select the "Choose Files" button (or drag and drop files for sending).
11. Navigate to and select files for upload.
12. Once all files are added, select upload files.
13. When the files have finished uploading you should see a confirmation web page. Once you have, email the studbook analyst at PMC@LPZoo.org and notify them of the sent files.

To save a new studbook you have received:

1. From your e-mail, copy and paste the .zip file to your desktop (or somewhere easy to find).
2. Right-click on the Zip file folder icon and choose 'WinZip, Extract to.' (If it asks, choose 'Use evaluation version.')
3. Use the browse button to find and open your 'PopLink Databases' folder (C:\My Documents\PopLink\PopLink Databases). Please note that is the default installation location for PopLink 2.3 & 2.4 databases. If you changed the default location of your saved databases you can find it by:
 1. Opening PopLink 2.3 or 2.4 (see #20 if help needed)
 2. Login
 3. Click Settings
 4. Check the "PopLink Files and Databases Location" to find where your databases are saved
 5. Follow unzipping instructions in #17 and #18 to save your database in the location found in the above step
4. If you are unsure how to browse, follow these instructions:
 - a. Click on 'Browse' in the Extraction window.
 - b. Click on 'My Documents.'
 - c. Click on 'PopLink.'
 - d. Click on 'PopLink Databases.'
5. With the 'PopLink Databases' folder highlighted, click on 'Ok' to close this second window. The top bar in the box should say "Extract to: C:\Documents and Settings\User Name\My Documents\PopLink\PopLink Databases"; click Extract or Next. Close out of the dialogue box when extraction is completed.
6. Open PopLink 2.3 or PopLink 2.4 (click on the PopLink icon on your desktop), go to Open Existing Database, and open your database.
